Ladies' Tucked Shirt Waist With Round Yoke. No. 906—Separate waists of pongee have been so very popular during the past season that they are ordered in favor of fall also, and many of the most effective fancy shirt waists are made of this fabric in the natural tints.

906—LADIES' TUCKED SHIRT WAIST WITH ROUND YOKE.
22, 24, 26, 28 and 30 inch bust.

Boru pongee is shown here trimmed with bright red velvet ribbon and bands of contrasting lace dyed to match the fabric. It is mounted on a glove-fitted feather-boned lining that closes in the center front and is faced with lace and ribbon to a round yoke depth.

Fine tucks at the neck and shoulders in the back face toward the belt, giving a long-waisted effect to the figure. A plain adjustment is maintained under the arms. The waist closes in front with fancy buttons and buttonholes worked through a center box plait. The full fronts are tucked from yoke to belt and blouse slightly. A collar is made of lace and ribbon to match the yoke.

Full sleeves are tucked to the elbow, fitting the upper arm closely. The puffs below the tucks are made of red and arranged on narrow white bias, drooping well at the back.

Waists in this style are made of soft tulle, gauze, crepe, China silk, satin, tulle, and other delicate fabrics, with lace, tucking, chiffon, motifs and Russian embroidery.

To make the waist in the medium size will require three yards of material forty-four inches wide, with three-eighths yard for trimming. The pattern, No. 906, is cut in sizes for a 22, 24, 26, 28 and 30 inch bust measure.

Ladies' Seven-Gored Skirt. No. 909—Although blouse skirts are still popular there is a strong tendency toward long skirts in the new fall models. The illustration shows an attractive skirt made of tulle, with a wide velvet ribbon waist and fringe for trimming.

909—LADIES' SEVEN-GORED SKIRT.
22, 24, 26, 28 and 30 inch waist.

It is shaped with seven gores, and its smoothness around the waist and hips without darts. The closing is made by a wide band at the center back under two inverted plaits that are fully pressed to give the appearance of a habit back.

Extensions added at the back edge of the gores are arranged in plaits that flare gracefully at the floor. These gradations in depth toward the back and provide additional width to the skirt.

Above these plaits each gore laps over the one behind it, the lapping being heavily machine-stitched. They are finished with fancy fringe. A band of velvet surmounts by lace forms the foot trimming. The skirt is fitted quite closely from belt to knee, but flares stylishly below that point.

Skirts in this style are made of ladies' cloth, shirtings, camel-hair, cheviot, covert, twill and wool crepes. They are finished with bands of braid or stitched straps of self-fabric for trimming.

To make the skirt in the medium size will require five and one-quarter yards of material forty-four inches wide. The pattern, No. 909, is cut in sizes for a 22, 24, 26, 28 and 30 inch waist measure.

The Republic's Order Blank for Above Pattern.

Be sure and fill in your correct post-office address.

Send 10 cents (one silver dime) to the Republic Pattern Department, Republic Building, for EACH pattern ordered and include this blank, properly filled out with your name, address and bust and waist measure for each pattern ordered.

CLOTH GOWNS WILL BE POPULAR FOR WINTER WEAR.

Simple Garments Are Also Much Liked, but They Are Not Fashionable for Evening—Satin-Finished Materials Are Used for Elaborate Costumes.

This model has the full collar and short revers in chineline folding into a double-breasted effect. The back is fitted, while the fronts are loose, with a turn-over cuff. The tulle is in gray squirrel with trimmings of chrysanthemums and velvet ribbon in red.

Cloth gowns are becoming more and more elaborate in design, until it would seem as though there might be a revolt from so much overloading of trimmings, so much pleating and shirring, and already conservative-minded women are talking of a different style of dress is demanded.

Plain skirts are rarely seen; there are flounces, one, two or three folds, and bands of the material of velvet, braid or fur. All skirts are long and long at the sides as well as in the back, made over a silk drap skirt extremely wide around the foot, it comes-fitting over the hips.

Long shoulder seams or trimming arranged to give the long shoulder effect, are very smart; flounces or caps in cloth are an waist as well as coats, and although too much of a blouse in the front of the water is no longer thought smart, a light-fitting waist is completely out of fashion.

Long drooping sleeves, finished with ruffles of muslin and lace, are necessary, and often the sleeve is slashed from wrist to shoulder and accordion-pleated chiffon or silk is inserted to give the required appearance.

These white muslin and lace ruffles are very effective, but when worn with black cloth jackets are almost too sharp in contrast and may become too popular before long. In all the light cloth gowns they are charming and most becoming; but, be it remembered, they become soiled and tumbled very easily, so that it is necessary to have several sets for each waist; otherwise, the fashion is one to be avoided.

Black cloth costumes are always smart and this year seem to be especially attractive. In them are so many different ways in which a variety of style can be gained, but the dark colored cloth gowns are most charming in color and design. Purple is very fashionable; green, one shade, rather a vivid one at that, brown and an exquisite violet blue are all in demand.

The satin finish smooth cloths are used

above the waist line or fast at the belt. They are called boleros and they are very effective to tell which is which. One runs into the other so closely that there is really no distinct difference.

SIMPLE CHILDREN'S FROCKS.
Shades of Red and Blue, Tan, Gray and Green Are Popular.

Fashions for children's frocks and costumes do not vary in the same extent from year to year as do those for grown-up people, but there is always enough change to make a last year's frock look quite old-fashioned if it is not remodeled.

The assertion is often made by those who are individuals who thoroughly understand the art of dressmaking that it is a mistake to spend much time or money on children's clothes.

The rule does not in the least apply to children's clothes, which can often, by careful making over, be made to look like new.

Simply put, it is fashionable for it is always economical as far as children's clothes are concerned.

A frock made without trimming and finished with tucks and deep hem can a second season be entirely changed in effect by rows of braid, which will where the tucks and hem were let down, and sleeves and waist can also be let down and changed in appearance.

Materials in solid colors are more fashionable this year than figured, and there is a wide range of choice in the color.

Different shades of red and blue, tan, gray and green are allotted to children, and it is after all, merely a question of which is more becoming color.

Light-weight shirtings (with not too rough a surface), cloth, camel's hair, serge, cheviot and twill are equally fashionable, while there are, as well, different kinds of so-called novelty goods that are effective.

There are several different models for skirts. The circular, the forced, the pleated, the gathered, made with round yoke and in pleats below the yoke, with attached flounce, with narrow or wide tucks. A charming design for a light tan cloth costume has a yoke at the sides and back, the front being plain, with attached bands at either side.

A full blouse waist, with stitched band in front and a deep collar, with a beaver hat the same shade this is a charmingly simple and very smart costume.

A favorite model in serge or camel's hair has a circular skirt with pleated waist, the pleats are finished with machine stitching, and there are attached tabs at either side of the front, but only long enough to reach a short distance below the belt.

There is a square yoke, very narrow, with a deep collar, which they are velvet, the only trimming except the fancy buttons.

In red camel's hair and with red beaver hat to match, this is a noticeably smart frock for a girl from 8 to 15 years of age.

STYLISH SHOES AND STOCKINGS.
Footwear Must Match Gown With Which It Is Worn.

So much more attention is paid in these days to having shoes and stockings to match the gown with which they are worn, or at all events to have them for each and every change of dress, that another and by no means a small item of expense is added to the total cost of the outfit.

In the first place, no woman who cares to be well groomed, but is moved past the door of a dressmaker, being always in good condition. It is not necessary to have shoes made to order in this age of the world; there is always a

and provide the best possible opportunity for the display of rich lace.

A gray satin gown with a deep band of rare old lace around the skirt and in panels at the sides, the front breadth with inserted medallion lace, outlined with an embroidery of silver paillettes, is most effective. The waist trimmed with bertha of lace to match that of the skirt, and with an embroidery of the paillettes across the front.

Crepe de Chine, either plain or embroidered, but with a satin finish, is made up on the same lines as the satin gown, but is also made with any number of tucks, pleats and cordings.

Narrow or broad bands of lace, the pattern of the lace outlined in steel pearls of tiny silver paillettes, put on an anti-deux and shining through the mesh of the lace.

A pale rose pink or Nile green lining is a charming original style and one that can be made up both with a high or a low waist, for theater or dinner.

There should not seem to be any reason why a pale gray crepe de Chine should look smarter than a white, but the favor of the color is also the favor of the color, but has a bit of white in its trimmings.

The lace used must, however, be on the yellow, not the white, shade, but not an ecru, that is, plain white of date.

VERDICT FOR MISS ROBERTS.
Obtains Judgment Against Doctor Davison for \$5,000.

Judgment for \$5,000 was given in Judge Ferrie's division of the Circuit Court yesterday against Doctor Thomas P. Davison in favor of Miss Freda Roberts, whom Doctor Roberts was charged with abusing.

He was treating her at his sanitarium in July, 1901, and she objected to the treatment, and he subjected her to rough usage. It was alleged.

The case had been tried three times. At the first trial in Division No. 7 of the Circuit Court, Judge Ferrie gave in favor of Miss Roberts a judgment for \$5,000. A new trial was granted and the case was taken to Judge Ferrie's court a change of venue. At the second trial the jury disagreed.

Miss Roberts is in Fulton, Mo., and is suffering from melancholia. It was claimed that her condition was caused by the treatment she received. It was contended in defense that her ailment resulted from illness.

SAFE-CRACKERS AT WORK.
Blow Bank Vault at Pilot Grove, but Fail to Loot Safe.

REPUBLIC SPECIAL.
Pilot Grove, Mo., Oct. 30.—Safe-crackers made an unsuccessful attempt to rob the Pilot Grove bank at an early hour this morning. They forced the outer door of the bank, and with tools stolen from the railroad section-house, forced the outer vault door.

Nitroglycerin was used in an effort to blow the safe. Three attempts were made without success. Private boxes in the vault were shattered in the jar and valuable papers were strewn.

Safe blowers visited this place about five weeks ago and blew the K. & T. safe, and a drug store safe, obtaining about \$10. The Missouri Bankers' Association has offered \$200 reward each for the capture of the culprits.

SEARCHERS FIND TWO BODIES.
One May Be That of Wealthy Stockman Who Disappeared.

Des Moines, Ia., Oct. 30.—While dynamiting the river for the body of Miss Lily Cole, who committed suicide by jumping from the Walnut street bridge last Tuesday, the police not only brought up the body of the girl, but that of an unidentified man.

The skull was crushed, and the police believe the body may be that of a wealthy stockman who disappeared in this city some time ago, and was thought to have been murdered for his money.

VICTIMIZED WEST END WOMEN.
Police Searching for Purveyors of "Genuine Scotch Lace."

The police are searching for two men, having, or assuming, a Scotch dialect, who have cheated several West End women by selling an inferior grade of lace, which they represent as being the genuine Scotch article.

Mr. Warren S. McCall of No. 674 West Pine boulevard reported to the police yesterday that he had paid for lace for his wife, and that the lace was not genuine Scotch, which she had purchased from the two men.

The police say other complaints have been received, but in each case the amount was small. The lace is sold at from 30 cents to \$1.50 a yard, and can be supplied at any of the department stores for 25 cents a yard.

SHOWERS ARE FORECAST.
Rain Will Be Followed by Colder Weather.

The forecast of the Weather Bureau for today indicates showers, with colder weather by this afternoon or to-night. A low from the Southwest will bring the rain and a high from the Northwest, which will drop in behind the low, will bring the anticipated drop in temperature.

Much colder weather is reported from the States west of the Mississippi, and warmer weather from nearly all stations east of the mountains. The temperature is below the freezing point in Wyoming, Montana, Idaho, Nevada and the eastern parts of Washington and Oregon.

MET BY A VOLLEY OF SHOTS.
William J. Engle Killed in His Home at Vincennes.

Vincennes, Ind., Oct. 30.—William J. Engle, secretary of the Vincennes Distilling Company and a prominent business man, was shot at his home early today.

Engle had risen early to take a train for St. Louis. While dressing he heard a noise in the kitchen. He went downstairs, and as he reached the kitchen he was met by a volley of shots.

Two bullets entered his head and he fell unconscious. He remained in an unconscious state for three hours, when he died. Officers are searching for the assailants.

RAN INTO AN OPEN SWITCH.
Tramp Killed in Wreck at Howell, Kas.

Hutchinson, Kas., Oct. 30.—Santa Fe westbound passenger train No. 5 ran into an open switch at Howell, Ford County, last night and crashed into a freight train which was standing on a siding.

The engineer and fireman jumped and saved themselves, but three tramps who were riding on the hind baggage got the full force of the collision. One, named William J. Engle, was killed, and another was seriously injured. The baggageman and expressmen were badly shaken up.

CAUSED A REIGN OF TERROR.
General Hart Investigating Conduct of Militiamen.

REPUBLIC SPECIAL.
Denison, Tex., Oct. 30.—General Luther Hart arrived here today to investigate the conduct of the Texas militiamen who passed through from Fort Riley, Kas., en route here to the battle of Panhandle.

He is here by Governor Lammam. The secretary, Doctor Charles O. Probst, augmented a reign of terror while here. They looted stores, assaulted citizens, disarmed the militia and defied the officers.

There is talk of the Governor disbanding the regiment.

BAKING POWDER
PRICE BAKING POWDER CO., CHICAGO.

TOUCH OF WINTER BRINGS NEW LIFE INTO BUSINESS.

Bradstreet's Says Crop Movement Is Freer and Demand for Seasonable Goods Increasing.

Dun's Review Asserts That Many Labor Disputes Have Been Settled, but Others Are Appearing.

New York, Oct. 30.—Bradstreet's to-morrow will say: "Cotton weather has stimulated retail trade quite generally throughout the country, and this is reflected in an improved demand for seasonable goods, especially heavy dry goods, clothing and shoes."

The movement of the crops has been from Northwest, West and South, and interior collections have improved.

On the other hand, strikes are ordered, and some mills will be closed by lack of new business, while the struggle for control of the copper properties has thrown thousands out of work.

While there is evidence of a set-back in the steel industry, and some hesitation in textiles at the Board of general order of three reports is encouraging for a continuance of prosperity, particularly in the section where agriculture is the chief occupation. Collections are causing some uneasiness, and financial conditions are unsettled.

Merchandise is freely distributed. Earnings for October for large stores last year by 6.9 per cent, and those of 1901 by 13.4 per cent. Purchases of iron and steel products are still restricted to immediate requirements, as a rule, although the decline in quotations appears to have been somewhat moderate.

The great industries show few changes for the time being. The cotton textile industry is somewhat depressed, but the wool textile industry is more active. The iron and steel industry is more active, but the coal industry is more depressed.
